

Elisir di Rocchetta Still Fruit Juice Drinks And Teas

Elisir di Rocchetta with its range of ready to drink teas and fruit based wellness drinks, has contributed towards the development of a new area of functional and healthy drinking. The key strengths of Elisir are: lightness, the unique and original balance of herbs with well-known health properties, tasty fruits, delicate flowers and last but not least the purifying properties of Rocchetta mineral water. The success of these drinks is also due to their high degree of innovation and naturalness; they are bottled on an entirely aseptic production line and contain no added colours or preservatives.
